

You've Been Busy!

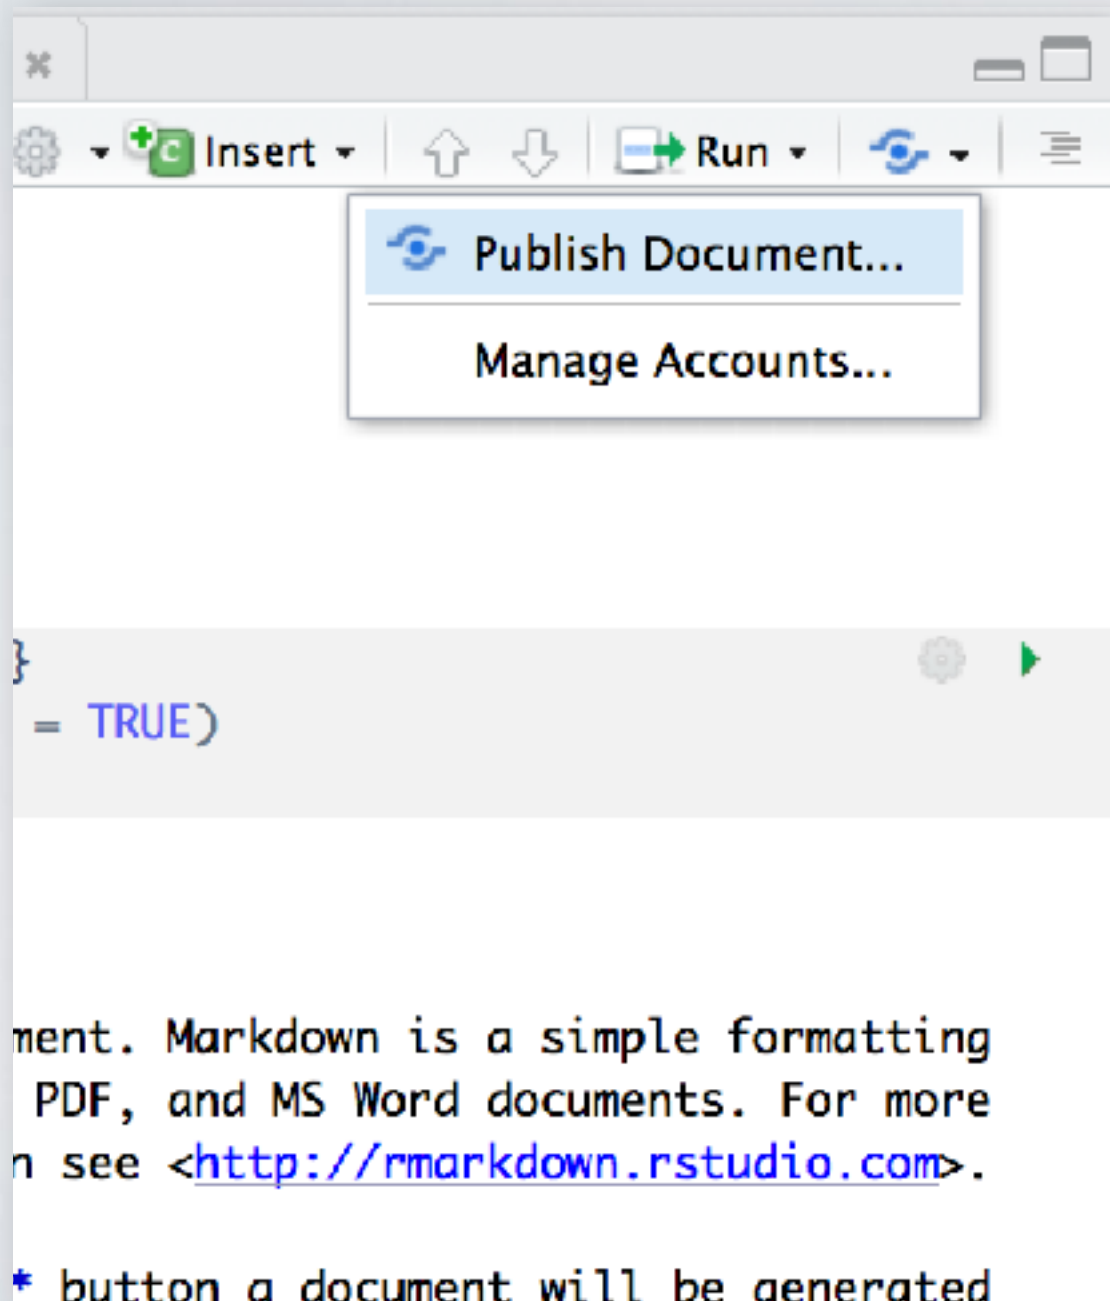

- Creating content in R:
 - plots
 - Shiny apps
 - notebooks
 - reports
 - HTML widgets
 - Presentations
- Where does it go next?

RStudio Connect

A new publishing platform for all the
work your teams do in R

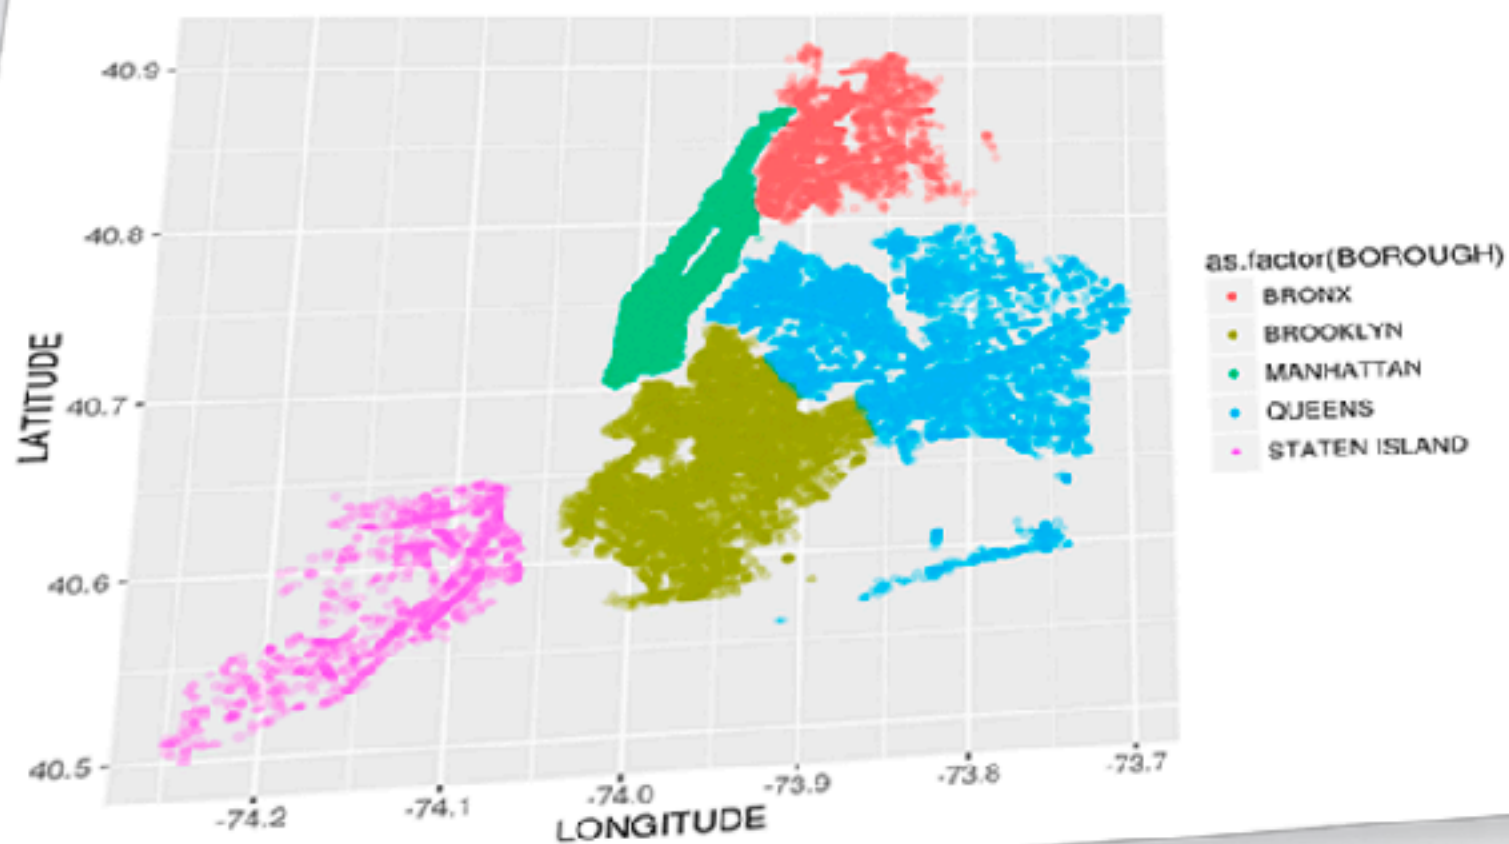

RStudio Connect

- Push-button publishing from the RStudio IDE
- Self-managed content: Shiny, R Markdown, plots...
- Scheduled renderings
- Enterprise security
- On-premises commercial product

```
cleanNY %>%
  sample_n(30000) %>%
  ggplot(aes(LONGITUDE, LATITUDE, color=as.factor(BOROUGH))) +
  geom_point(alpha=0.2, size=1) +
  guides(colour = guide_legend(override.aes = list(alpha = 1)))
```

Demo

Intelligent Deployment

- Manages dependencies using Packrat
- Captures local file dependencies

The screenshot shows a window titled "Deploy" with a "Markers" tab. The log displays the installation of dependencies for a project named "mpg-cyl-report.Rmd". The log entries show the installation of various packages, including backports, base64enc, bitops, digest, highr, jsonlite, magrittr, mime, packrat, and stringi, all of which were installed successfully from the symlinked cache.

```
put/mpg-cyl-report.Rmd
05 16:01:57.550483474 Installing backports (1.0.4)
05 16:02:02.185643162 OK (built source)
05 16:02:02.186213875 Installing base64enc (0.1-3)
05 16:02:02.222499846 OK (symlinked cache)
05 16:02:02.222973316 Installing bitops (1.0-6) ...
05 16:02:02.253677871 OK (symlinked cache)
05 16:02:02.254119388 Installing digest (0.6.10) ..
05 16:02:02.311460324 OK (symlinked cache)
05 16:02:02.311906766 Installing highr (0.6) ...
05 16:02:02.367950857 OK (symlinked cache)
05 16:02:02.368395788 Installing jsonlite (1.1) ...
05 16:02:02.458444948 OK (symlinked cache)
05 16:02:02.458867204 Installing magrittr (1.5) ...
05 16:02:02.485612299 OK (symlinked cache)
05 16:02:02.486015743 Installing mime (0.5) ...
05 16:02:02.543899898 OK (symlinked cache)
05 16:02:02.544326516 Installing packrat (0.4.8-1)
05 16:02:02.574091620 OK (symlinked cache)
05 16:02:02.574407239 Installing stringi (1.1.2) ..
```

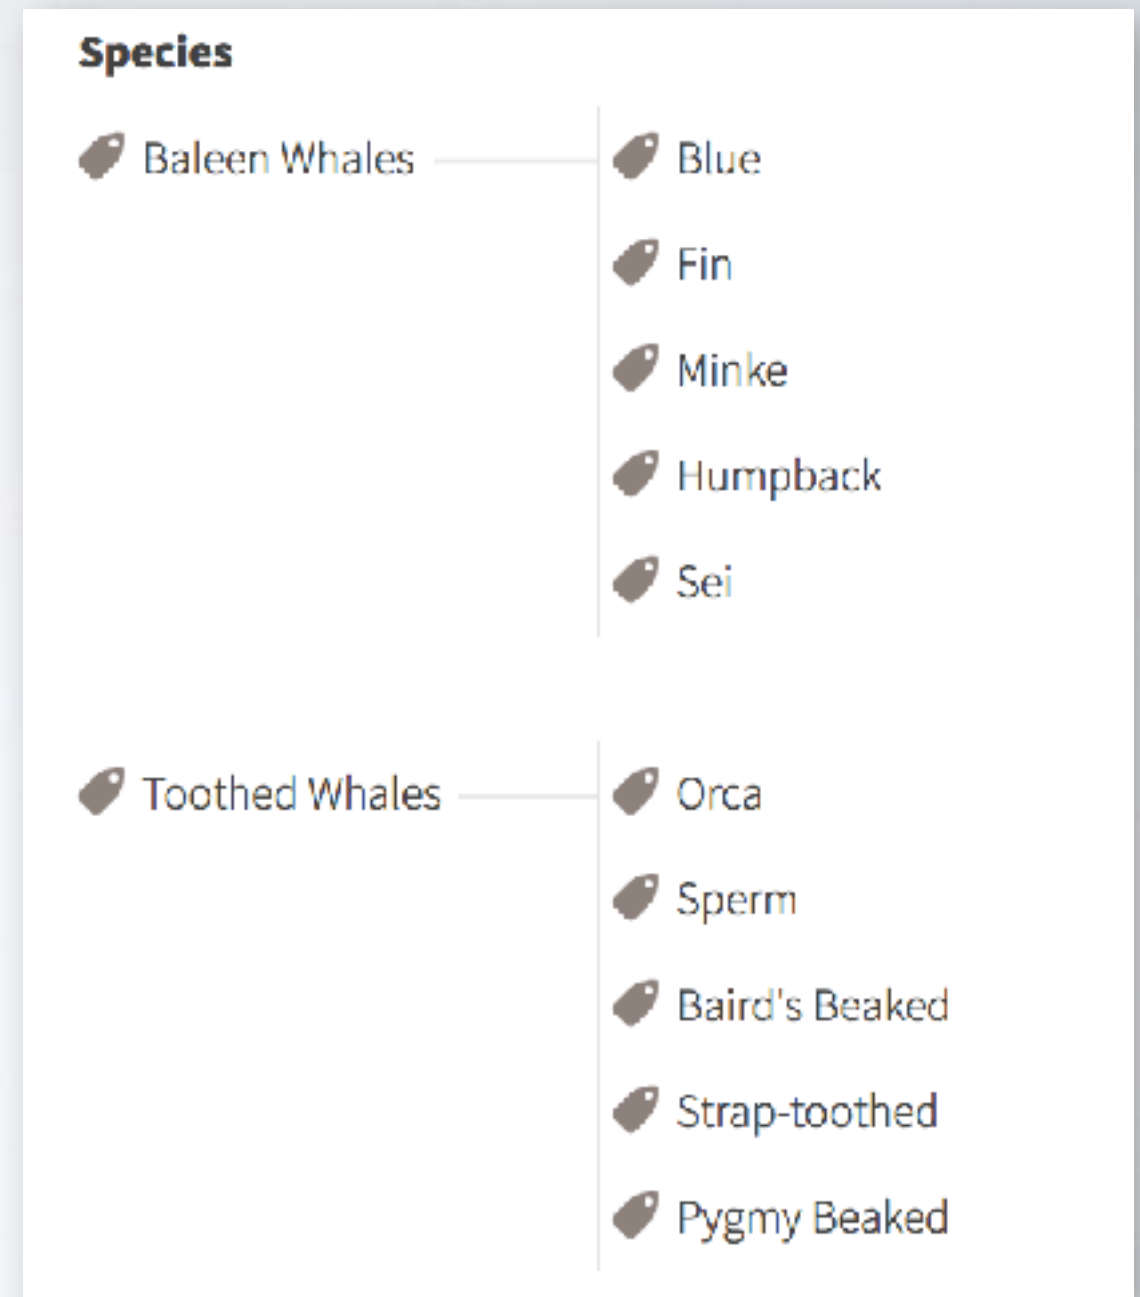

IT-Friendly

- Enterprise authentication
 - LDAP/Active Directory
 - PAM
 - Google OAuth
 - Built-in username & passwords
- Server monitoring
- Audit logging

What's Next?

- Content organization
- Kerberos
- Bundle management and rollback
